FINISHES

There are a number of finishes available across all our ranges; offering different levels of corrosion resistance and a choice of price points.

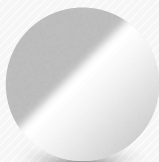

SELF COLOUR

Unfinished steel. These products are typically used in fabrication, and will naturally rust very quickly – this should be removed prior to galvanisation.

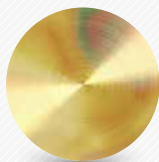

EPOXY BLACK/EPOXY BROWN

Polyester powder coating is baked or sprayed onto the raw metal, resulting in a smooth finish. Provides limited corrosion resistance on moving parts as the finish can flake off, meaning the steel will corrode more easily.

BZP

Also known as Zinc Plated. These products have been finished with a process of electroplating zinc onto steel, resulting in a shiny finish about 6-8 microns thick. Although zinc plated products are typically cheaper than galvanised ones, they usually rust more easily due to the thinner coating.

BZP/YP

Also known as BZP/Yellow Passivated. These products have a zinc plated finish with an additional yellow passivating treatment. This extra layer increases the corrosion resistance and gives the product a light yellow appearance.

PRE-GALVANISED

These products are fabricated from sheet steel that has already been galvanised, giving a finish approximately 20 microns thick. The resulting corrosion resistance is between that of hot-dip galvanising and zinc plating.

GALVANISED

A 'hot-dip' or 'spelter' galvanised finish approximately 60 microns thick. The product is dipped in molten zinc, resulting in a thick, rough coating that has a high corrosion resistance.

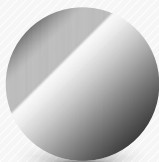

PREMIUM BLACK

A 'hot-dip' galvanised finish with a black polyester powder coating on top. This double layer results in a high level of corrosion resistance.

RUSPERT® GREEN/SILVER

Ruspert® is a rustproof treatment technology with superior corrosion resistance. An organic coating, containing aluminium flakes, and special rustproof paint passivates the metallic layer, preventing intrusion from corrosive factors and controlling the self-sacrificial galvanic effect of zinc.

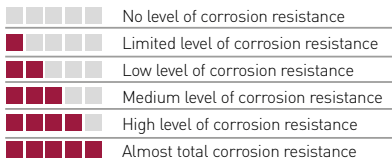

STAINLESS STEEL

Stainless steel is an iron alloy with high levels of chromium; giving it an external layer that is virtually rust free. Our premium range products are made from marine grade 316 stainless steel – ideal for coastal and other high-moisture environments.

CORROSION RESISTANCE

GATEMATE® LOCKS, SECURITY AND HANDLES

GATEMATE® Long Throw Locks

GATEMATE
Superior Gate Furniture

EURO PROFILE LONG THROW LOCK

High security stainless steel screws and driver bit included

Elongated anti-rattle keep with anti-chafe plate to prevent wear on the face of your post

High corrosion resistance; 316 stainless steel locking bolt

Narrowed body to allow installation at any height on stile; double thickness back plate

PATENT PENDING
07225GB AND 07256GB

High security 6 pin lock barrel; available to suit 50mm and 70mm gates

Polished stainless steel escutcheon plate

Comes with 5 keys as standard

Convenient, durable and reliable security by GATEMATE®

- Suitable for gates, sheds and garage doors
- Double or single sided locking options
- Yale profile key
- Can be keyed alike to any key number, enquire for more details!
- Keyed alike locks also available
- Comprehensive fitting instructions with self adhesive drilling template for easy installation
- The barrel can be changed
- Handles to suit available separately, see page 6

GATEMATE® HINGES

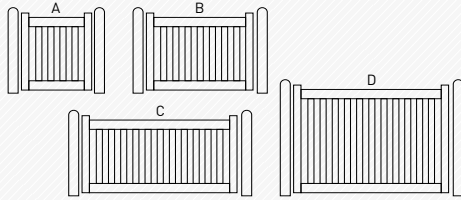

GATEMATE®
Superior Gate Furniture

HINGE LOADING APPLICATION PER PAIR

When selecting hinges for your gate please ensure that you choose ones with the correct loading application.

This is only approximate hinge loading application as none of our hinges are tested.

For heavier gates, an additional hinge can be added.

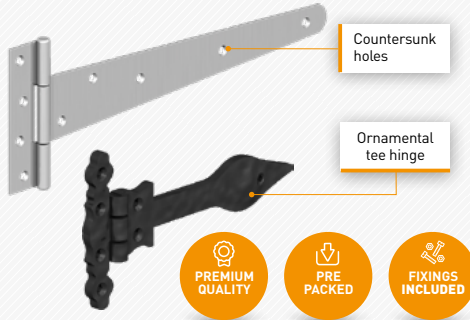

GATE TYPE	CLASS	WEIGHT	MAXIMUM WIDTH
A	SMALL GATES AND DOORS	UP TO 10KG	900MM
B	MEDIUM GATE	UP TO 20KG	1200MM
C	LARGE GATE	UP TO 50KG	1800MM
D	EXTRA LARGE GATE	UP TO 80KG	2400MM

GATEMATE® Tee & Strap Hinges

GATEMATE®
Superior Gate Furniture

TEE HINGES

- Suitable for a huge range of gates; with light, medium and heavy weights
- Available in stainless steel and premium black (epoxy black on galvanised steel) finishes
- Ornamental designs also available
- Loading application A-D; see above
- Supplied with high performance ruspert woodscrews

ADJUSTABLE BAND & HOOKS ON PLATES

These heavy duty, robust hinges provide full adjustability; allowing the installer to align gates both during fitting and afterwards to compensate for gate drop over time. Ideal for use on high-use/heavy gates and external doors.

- Easy to fit and adjust
- Available in a range of sizes and finishes including stainless steel and premium black (epoxy black on galvanised steel) finishes
- Wide range of sizes
- Loading application B - D; see page 27

GATEMATE® Adjustable Band & Hook on Plate

These GATEMATE® band and hook hinges are both easy to fit and use; allowing the installer to align gates during fitting, and adjust afterwards to compensate for gate drop over time

GATEMATE® PREMIUM FINISH RANGE

Stainless Steel

Stainless steel is an iron alloy with high levels of chromium; giving it an external layer that is virtually rust free. Our premium range products are made from marine grade 316 stainless steel – ideal for coastal and other high-moisture environments.

See page 27 for table of loading applications for hinges.

GATEMATE® Easi-Fit Adjustable Gate Post System

GATEMATE®
Superior Gate Furniture

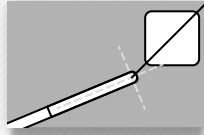

EASI-FIT ADJUSTABLE GATE POST SYSTEM

With unique anti-finger trap technology

- 3D adjustable pivot hinges available to prevent finger trapping - no other hinge system on the market has this benefit
- Height adjustable even after installation
- Unique high-load fixings; no need for welding, drilling or threading
- Patent Pending technology

Want a little more information?

View our
GATEMATE®
Easi-Fit
Adjustable Gate
Post brochure
online

Positioning the gate so the edge is on the corner of the post ensures the gap between the two remains consistent; removing the danger of finger trapping bringing you in line with legislation.
